

New Tokenomics. **With LIQ 2.0.**

09.11.2023

Terms and Conditions apply.

A new vision calls for
an upgraded asset!

Liquidus loves

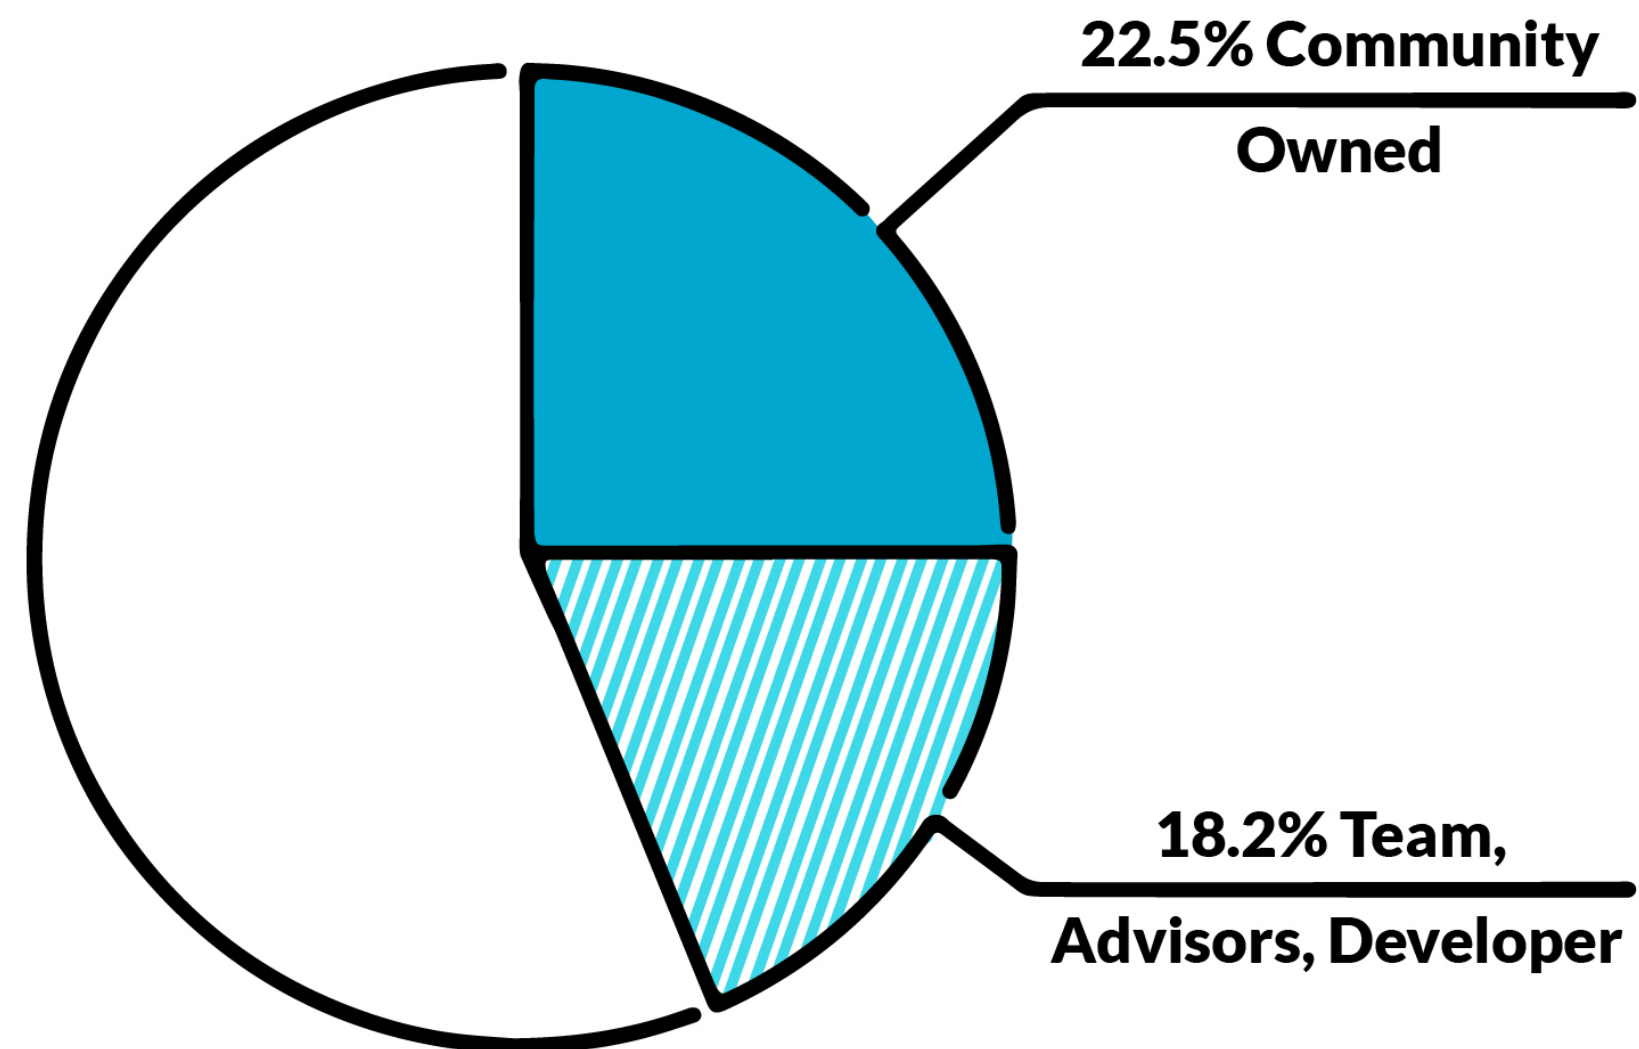

Decentralization

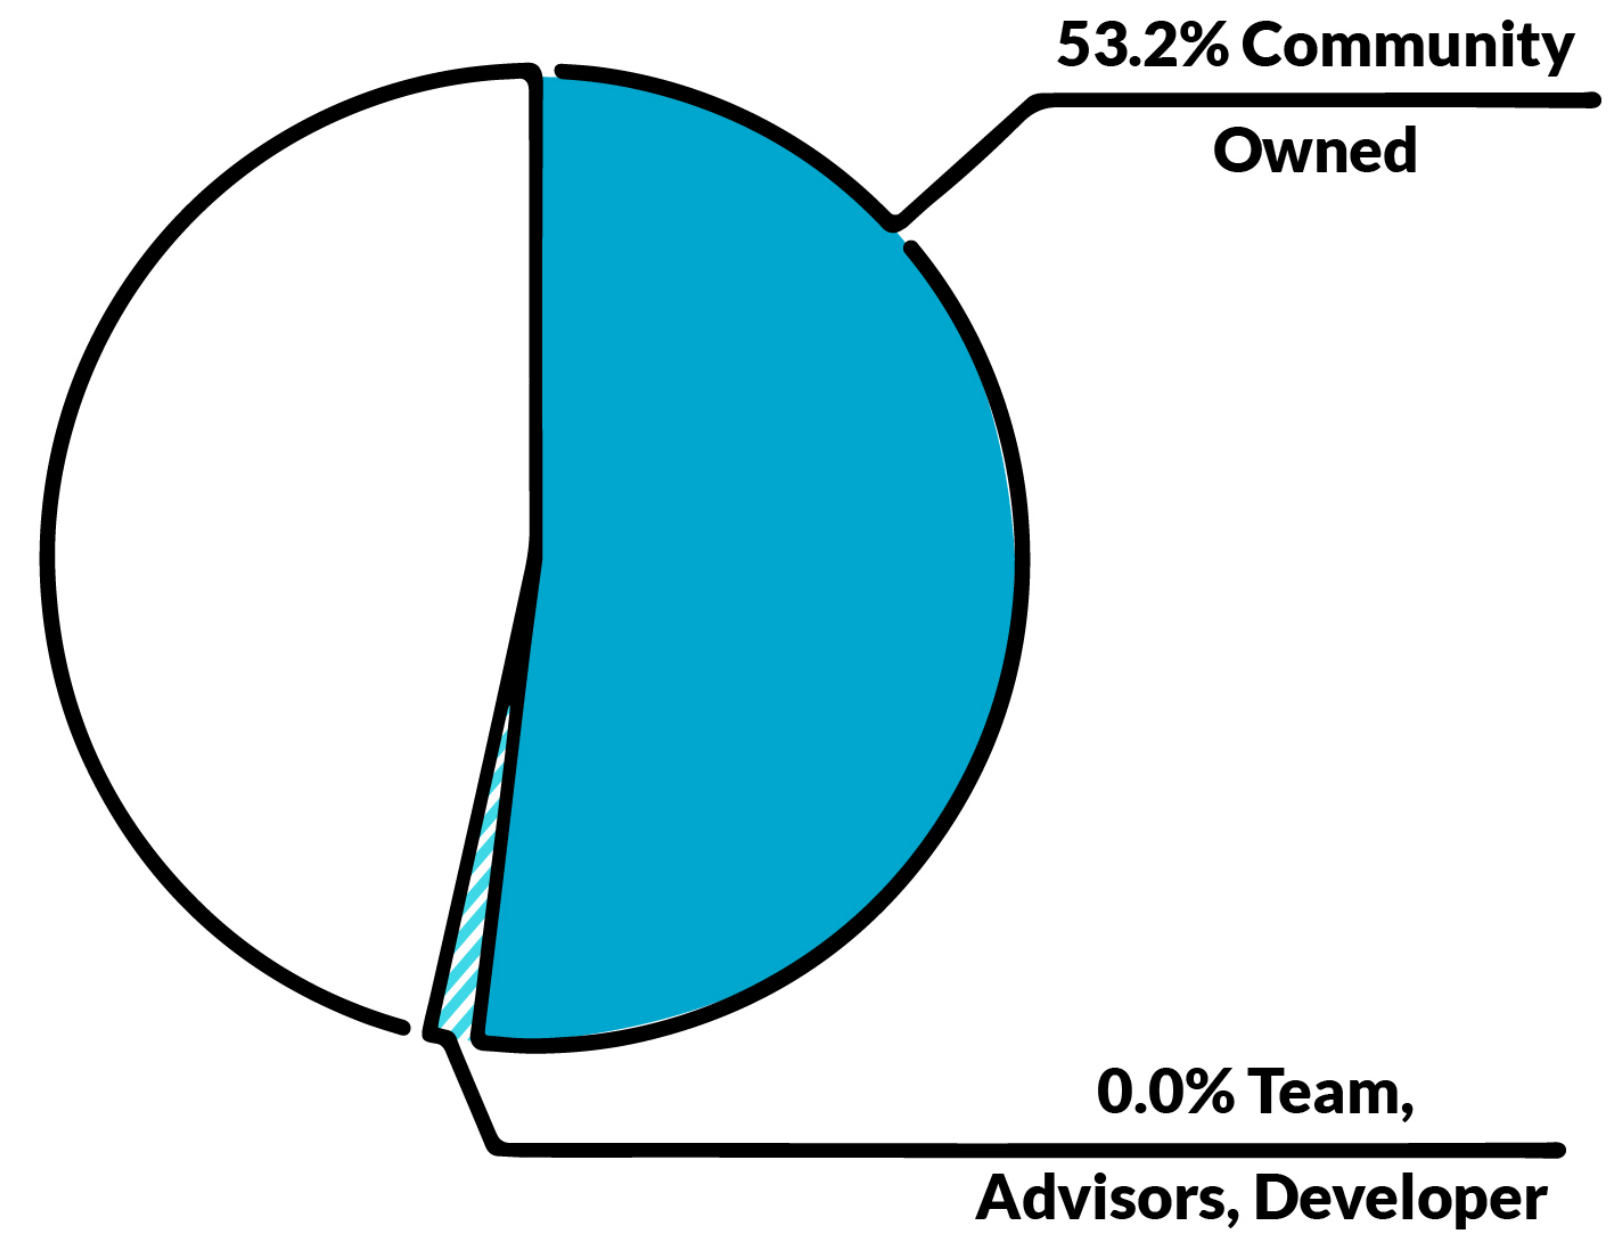

...because the future is decentralized.

CLASSIC LIQ

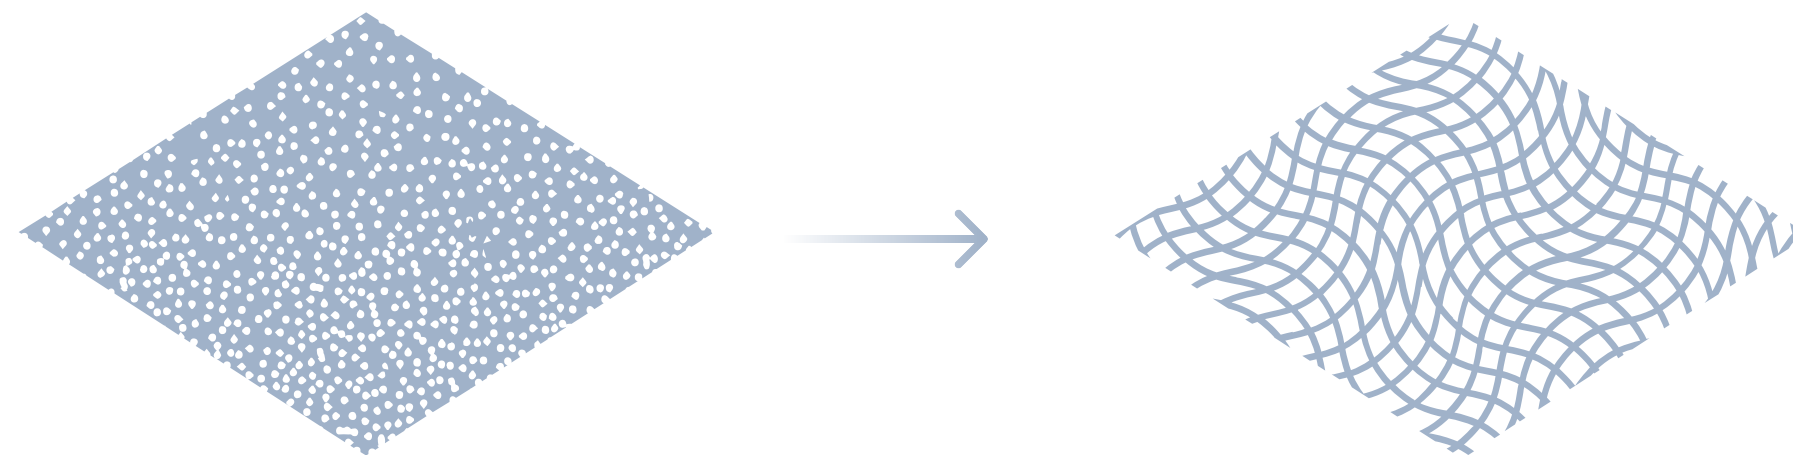

NEW LIQ

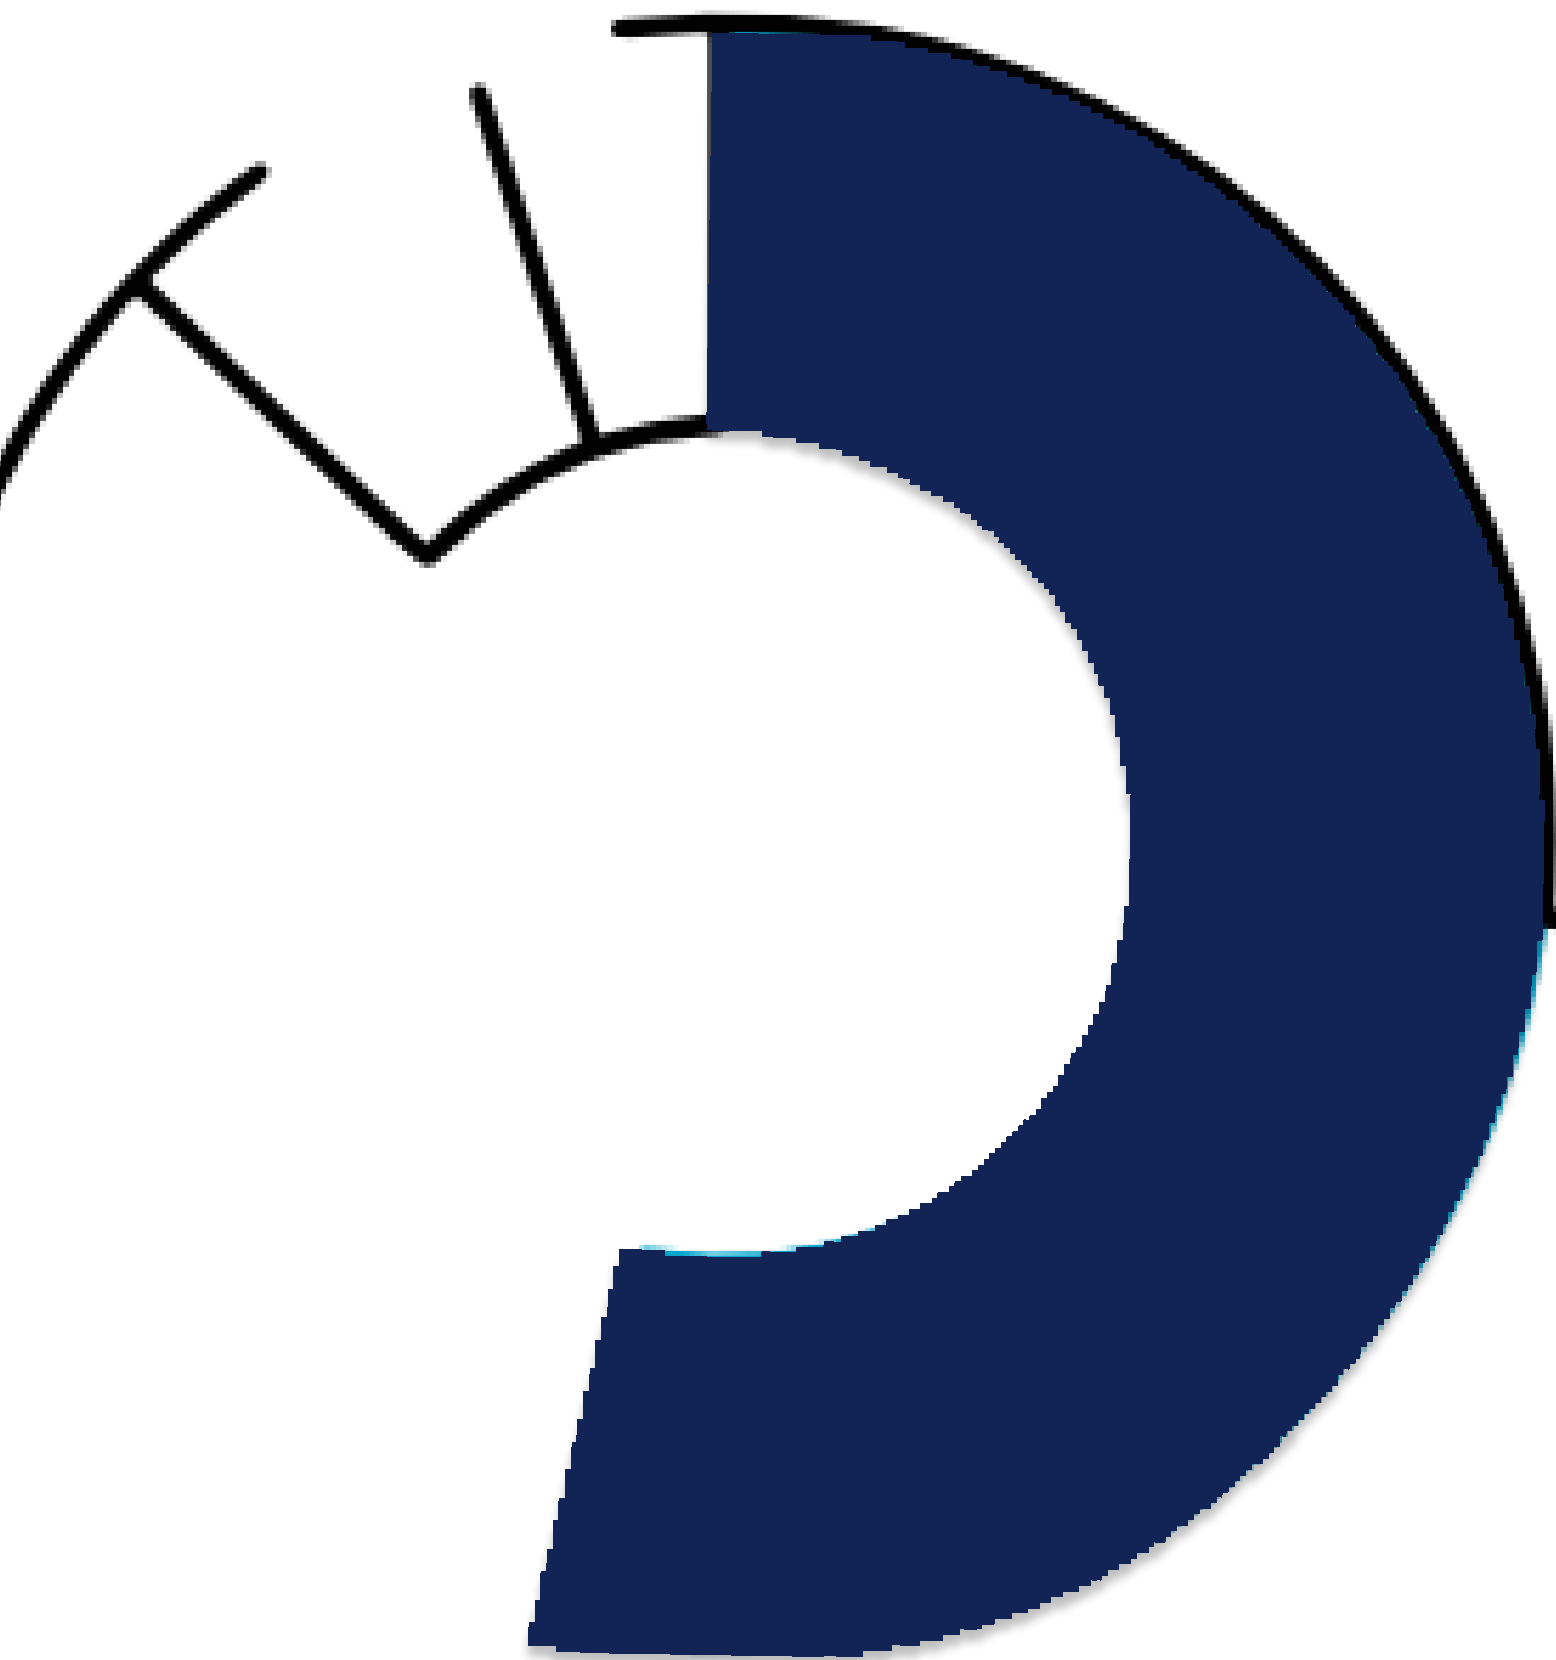

**The new LIQ token is
majorly decentralized.
There are 136% more
tokens in the hand of
the community.**

Updated Distribution

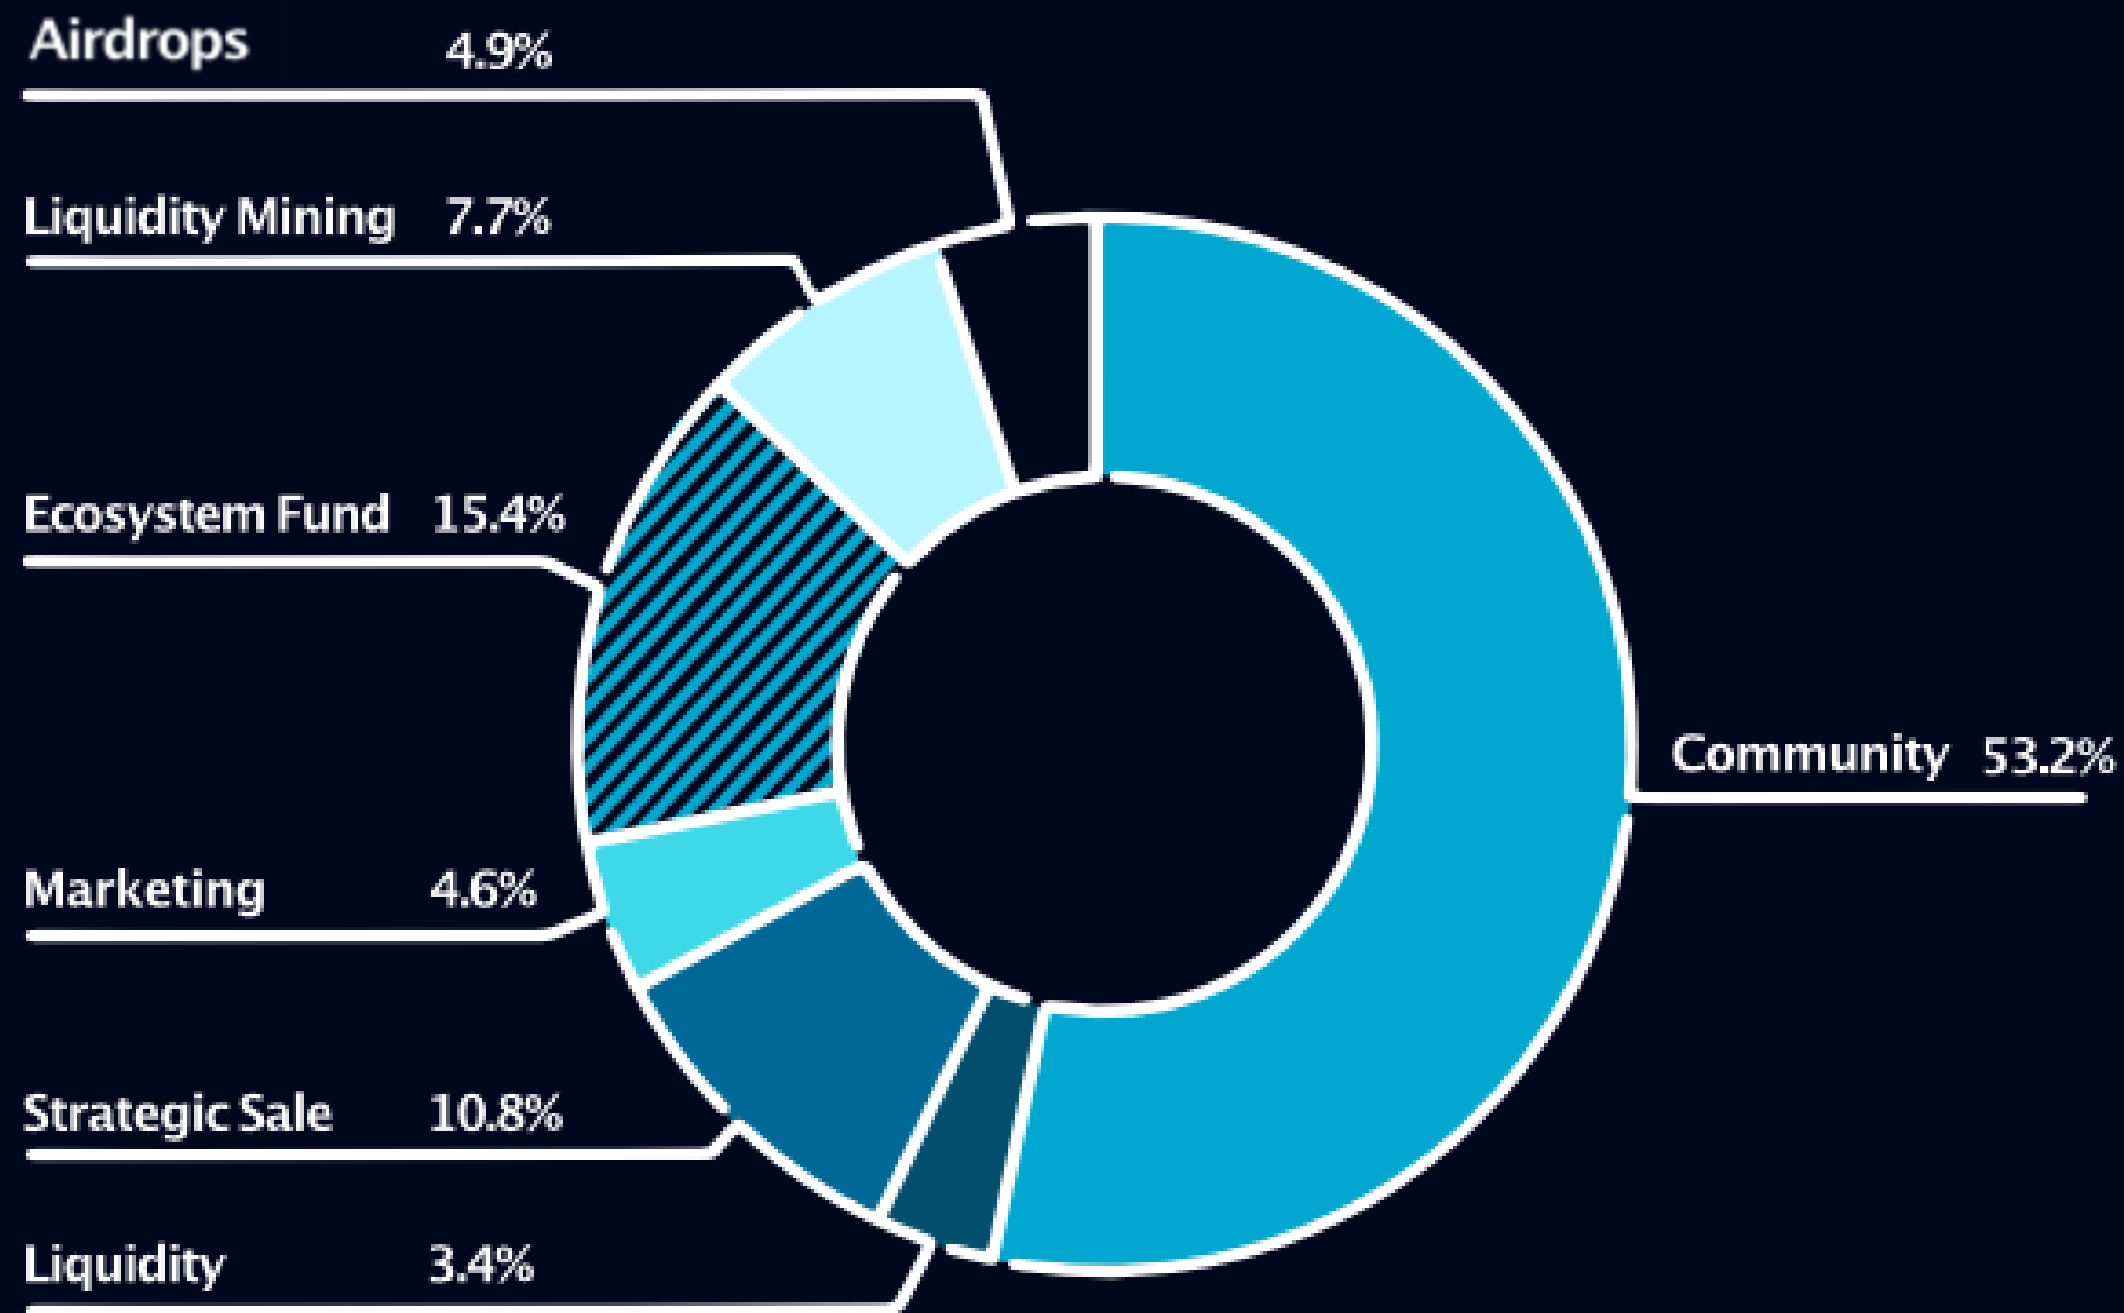

Community owned.

Community 53.2%

NEW LIQ SUPPLY: TOKENS

- Community
- Liquidity
- Strategic Sale
- Marketing
- Ecosystem Fund
- Liquidity Mining
- Airdrops

Updated Vesting schedules

& Liquidity Locks

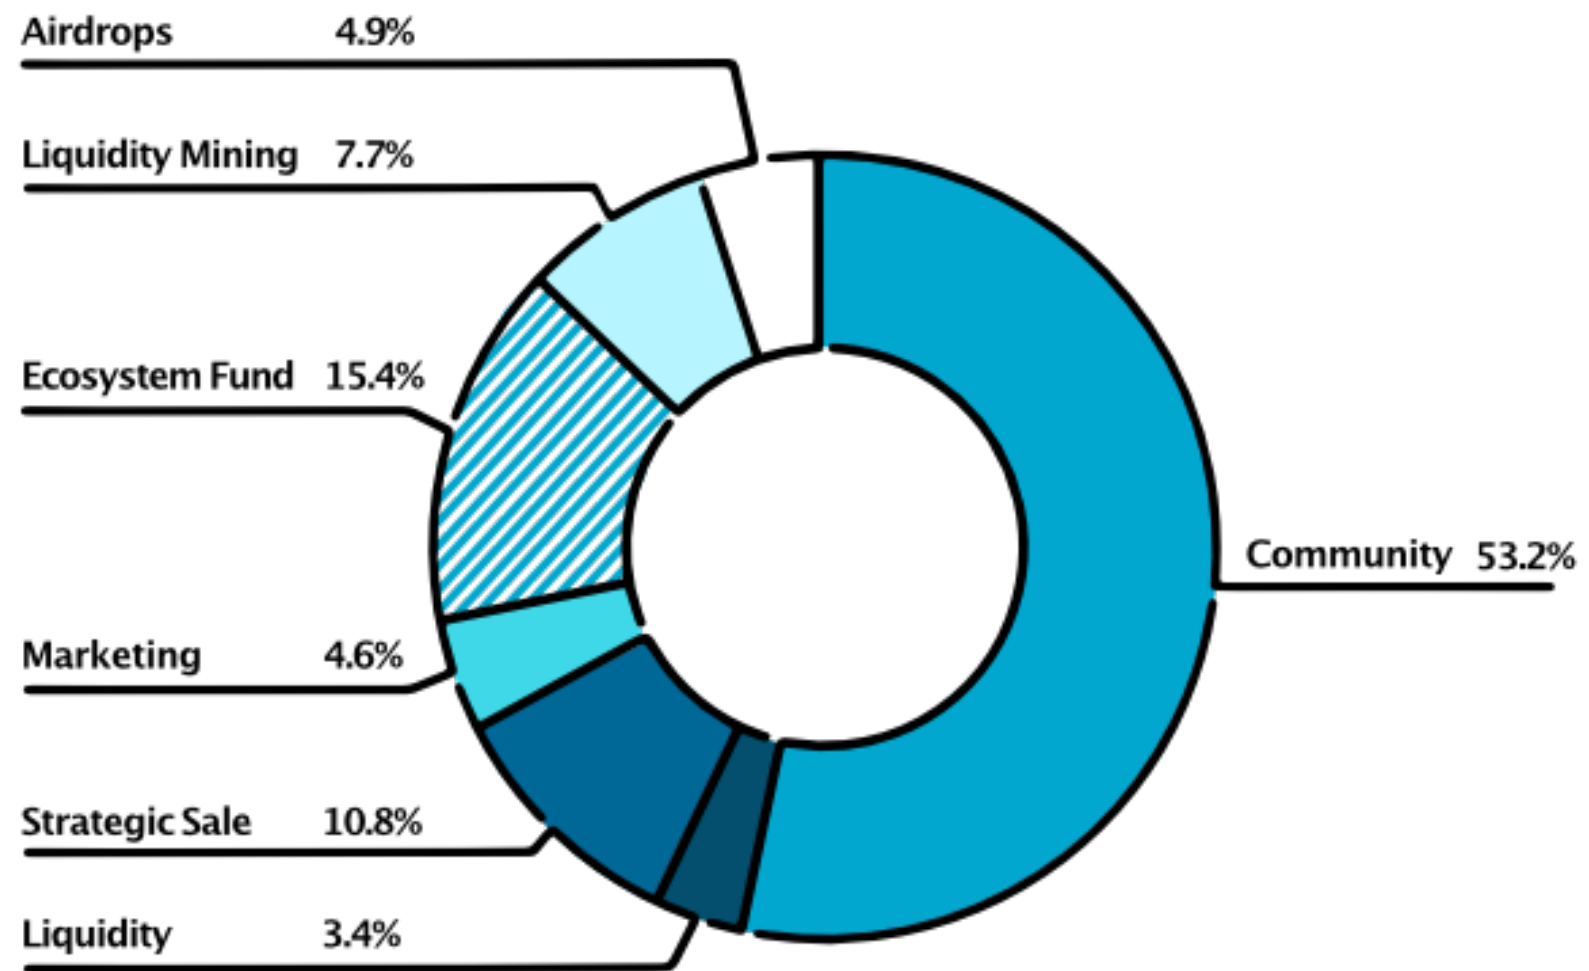

Community Held by the community across 5000 holders

Liquidity Liquidity added at token launch and locked for 12 months

Strategic Sale Locked for 3 months. Then unvested linearly over 12 months and reserved for future raises

Marketing Unvested linearly over 12 months.

Ecosystem Fund Unvested linearly over 24 months to grow the ecosystem and attract users via Liquidus Boost and other incentives.

Liquidity Mining

40% unlocked at launch and deposited to farm contracts. Rest unvested linearly over 12 months.

Airdrops

1/4th unlocked at launch to be able to run airdrops. The rest unvested linearly over 24 months

Reminder

Liquidity Relock

After the liquidity unlocks, it will be relocked partly with the New LIQ on Migration day.

 **25%**

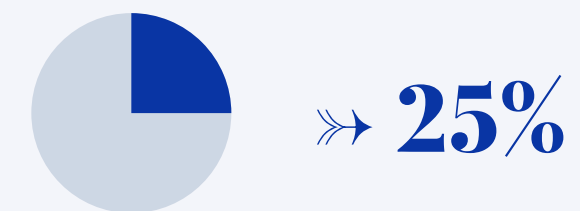

of the liquidity is kept for the Classic LIQ for a transition period and locked for **3 months**. After the lock ends, the liquidity is paired with the New LIQ and locked for **9 months**.

\$100,000

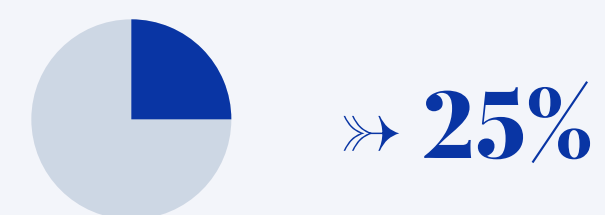

Currently the projects owns liquidity in BNB-LIQ worth roughly

75%

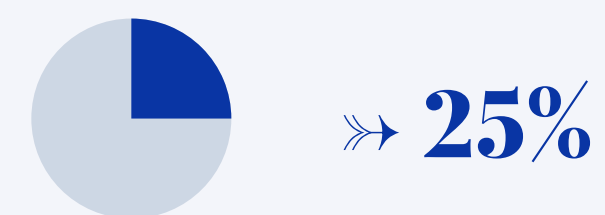

of the liquidity is paired with the New LIQ token and locked for 1 year.

BTCB-LIQ

ETH-LIQ

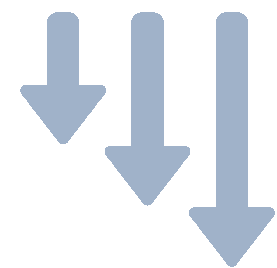

BNB-LIQ

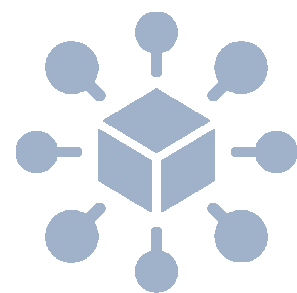

New \$LIQ Token supply

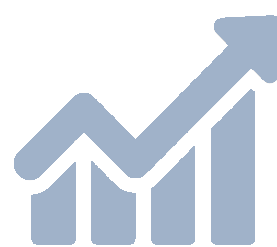

How many tokens is it going to be?

We are glad to announce that the LIQ token supply has been reduced drastically.

This makes the token more decentralized. Each token gets more valuable because there are less tokens existing.

LIQ is also deflationary due to our buyback and burn program.

New \$LIQ Token supply

Classic (old) LIQ supply **77 000 000**

5:1 Rate

15 400 000

Calculated theoretical new supply

Manual Reduction

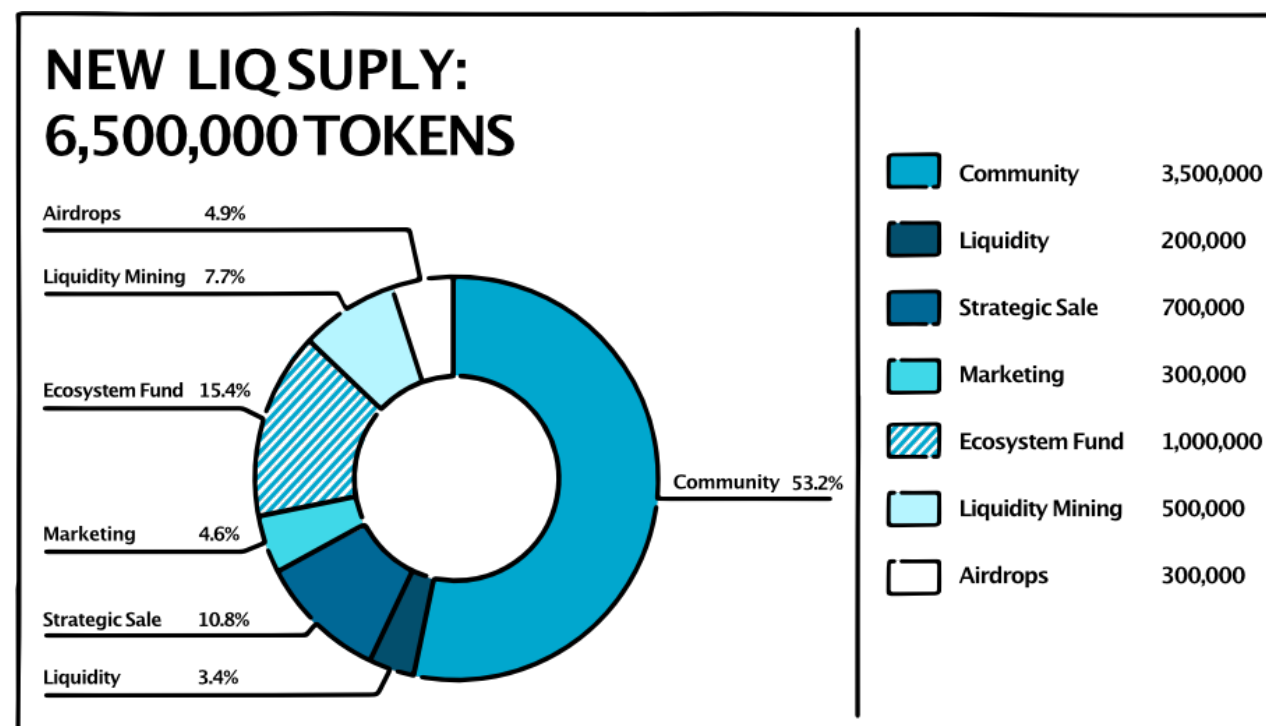

-8 900 000

6 500 000

LIQ 2.0 Supply

Actual new supply

The new LIQ supply is reduced by 58%.

How does the migration Work?

Migration starts **TODAY**

Reminder

Token Migration. 5 to 1 Ratio.

Holders of the Classic LIQ can migrate their tokens to the New LIQ.
 There is a migration rate **of 5 : 1**. Which means 5 Classic LIQ equal 1 New LIQ.
 In terms of value, the migration rate is neutral. For example, if Classic LIQ is worth **\$0.05** at the time of the migration, New LIQ is worth **\$0.25**.

\$ 0.05 Classic LIQ

\$ 0.25 New LIQ

\$ 0.12 Classic LIQ

\$ 0.60 New LIQ

We chose to use this 5:1 migration rate, to move LIQ outside of the “penny stock / meme coin” price range. New LIQ will become a more noteworthy asset.

1. From the **Farm-page (browser)**

farm.liquidus.finance/migrate

2. From the **App**

Open the side menu and click on
“LIQ Token Migration”
(after update is available)

Attention

Tokens on ETH, CRONOS, or POLYGON

First Shuttle: 24h past migration launch

Second Shuttle : 1 week after migration launch

You can use the same page to migrate, however, you need to pay attention to the **shuttle dates**.

As you are going to receive your tokens on the BSC network, the New LIQ must be sent manually by the team.

There will be several shuttle dates where the New LIQ tokens get airdropped.

Third Shuttle : 1 month after migration launch

Fourth Shuttle : 3 months after migration launch

Last Shuttle : 12 months after migration launch

Token expansion

Our commitment to Zk-Layer 2 Technology.

We acknowledge this technology to be one of the most important advancements in decentralized public blockchain technology.

Liquidus will utilize ZK proof layer two technology in its products including – but not limited to – building on and utilizing the leading ZK-layer two protocols on Ethereum.

Mission

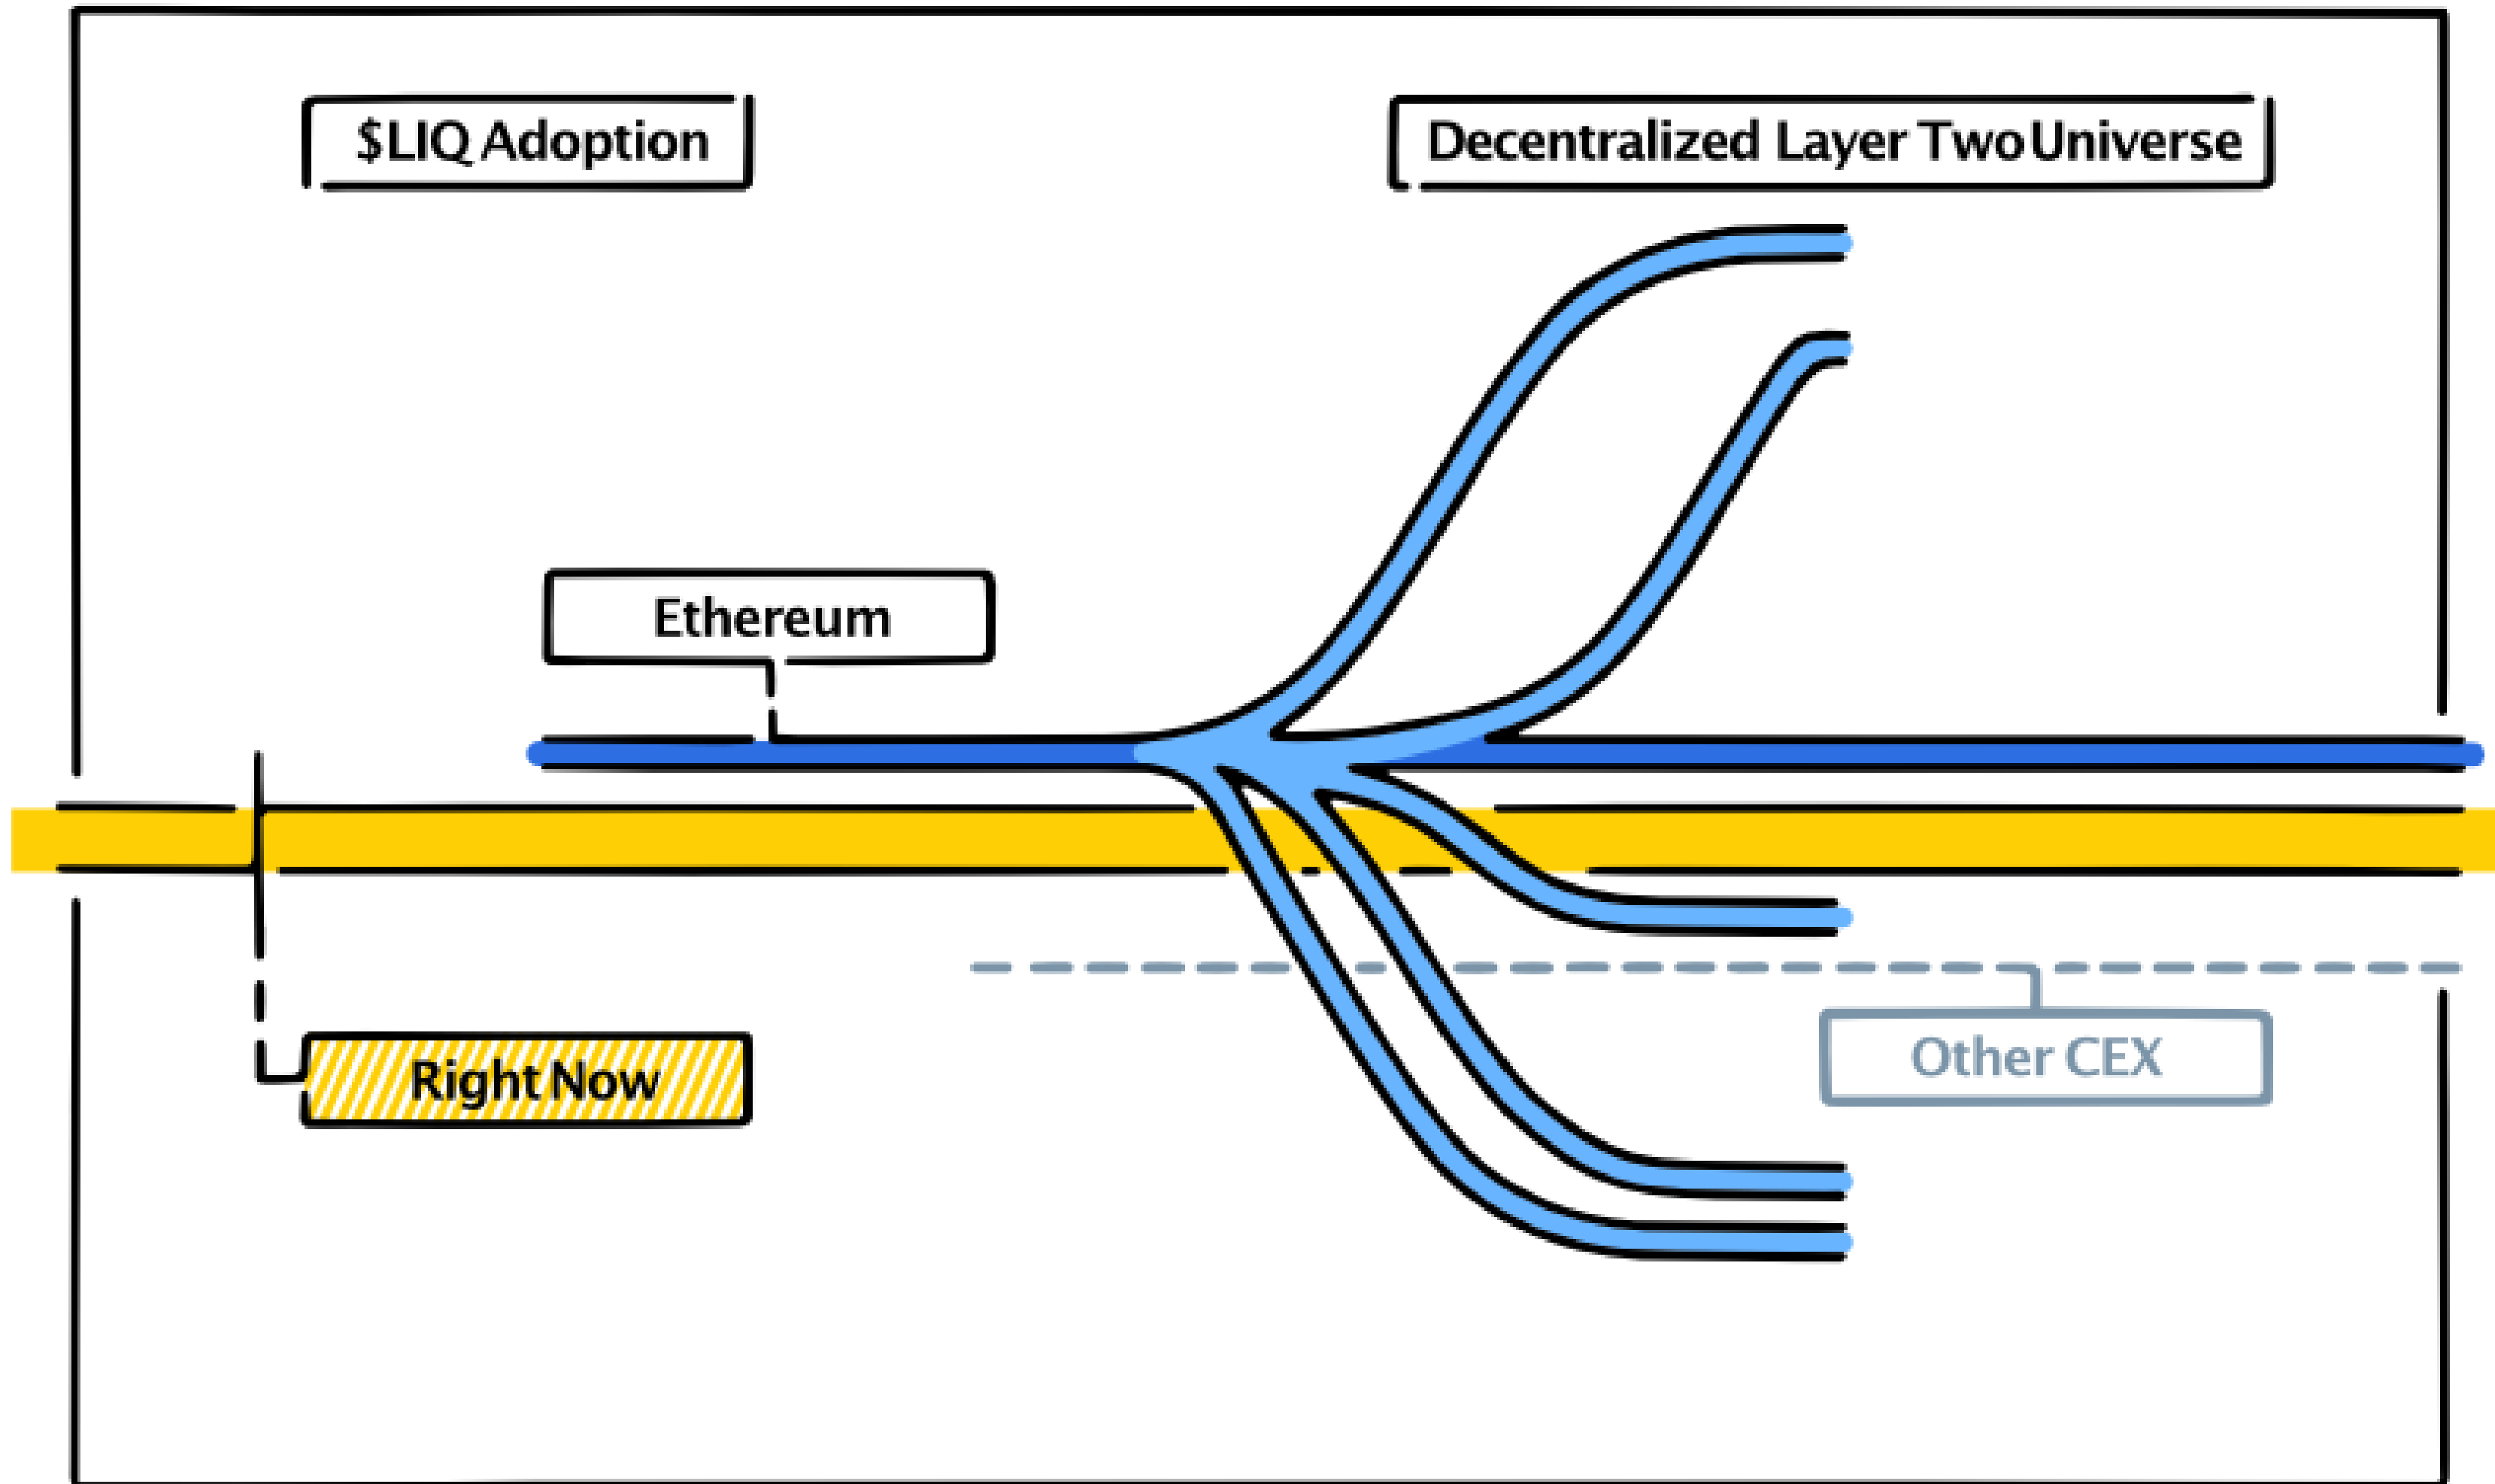

Decentralized Layer Two Universe

Ethereum

Right Now

Mission

**Ready for a
multipolar
decentralized
multi-chain
future.**

The Liquidus Foundation will never build ‘another chain’.

We take the best technology and protocols and build solutions to open them to more users.

Tune in on the **19th of November** for the Foundation Launch

Ready?

LIQ Migration Is About To Start

Attention

Delays with

Coingecko & CMC

Attention

CMC and CG listings might show outdated information for a few days.

Due to their processes being slow we are predicting some inconsistencies on how Liquidus is listed on these sites. If in doubt, always check our original resources.

Attention

**Only use official resources.
We NEVER message first.
There is no official support.**

Ready?

LIQ Migration Is About To Start

We are now taking live the farm page and the new app update.

After all is done, the old farm will be unlocked.

We want to point out that there is no benefit in migration a few hours sooner or later.
